## Career Objectives

To secure a challenging role in Information Technology within a dynamic and forward-thinking organization. I aim to leverage my extensive experience in UI development, API development, database design, and third-party integrations, honed through successful projects in diverse domains. With a commitment to continuous learning and a track record of dedication and hard work, I strive to contribute my skills and expertise to drive innovation and achieve mutual success within a collaborative team environment.

---

## Experience

---

### **Boltech Solutions** / Software Developer

January 2019 - PRESENT, LAHORE

#### **Product Enhancement and User Experience Improvement:**

Elevated features and optimized user experience across multiple products for *Exceed IT Services* through proficient use of Angular and .NET Web API technologies.

#### **Database Design and API Development:**

Spearheaded the design of a MySQL-based database and crafted RESTful APIs using Laravel for a prominent kids' learning platform in Indonesia, *Titik Pintar*.

#### **Full Stack Development for UFC Gym Pakistan:**

Functioned as a Full Stack Angular/.NET Core Developer, contributing to the ERP system of *UFC Gym Pakistan*, ensuring seamless integration of front-end and back-end components.

#### **Microservice Development for Fintech Application:**

Developed a robust PHP/Laravel-based microservice for automated charging within a Fintech application, ensuring efficient and reliable financial transactions.

### **Stepnex Services** / Laravel Developer

SEPTEMBER 2018 - DECEMBER 2018, ISLAMABAD

- Worked on an ERP system for the *Federal Public Service Commission* of Pakistan.
- Worked as a part of the team responsible for delivering the HR Module and Inventory Module of the project.
- Enhanced my skills on Oracle database through Laravel ORM and raw sql queries.

### **ifast (SMC-Pvt.) Ltd.** / Full Stack Developer

JANUARY 2016 - AUGUST 2018, ABBOTTABAD

Worked as a Full-Stack developer and enhanced my skills by working on different sets of technologies for different products. My job responsibilities included:

- Designing database structure.
- Building REST APIs using Django REST Framework, and Laravel.
- Designing UI and consuming REST APIs using Angular.
- Developing hybrid mobile applications using Ionic/Cordova.

---
